

Vertex Studio: Salvadoran Innovation in the Technological World

Welcome to Vertex Studio!

We are a prominent startup founded in El Salvador in 2016, and we have become a reference in creating cutting-edge solutions in specialized technological fields. From simulations to extended reality experiences, through generative artificial intelligence and machine learning, we are here to take innovation to the next level.

Our Services:

- **Advanced Simulations:** We develop realistic and advanced simulations for a wide range of applications, such as digital twins, AI training for analysis and data collection, in any industry.
- **Extended Reality Experiences:** Immerse yourself in virtual and augmented worlds that challenge reality and enhance creativity and interaction.
- **Generative Artificial Intelligence:** We use AI to generate creative and adaptive content, from digital landscapes to unique characters.
- **Machine Learning:** We develop customized machine learning solutions to optimize processes and make data-driven decisions.

Relevant Achievements:

- **Winner of the EPIC MEGA Grants (2017):** We received \$150,000.00 USD for the development of our own simulation engine, SIMBOTIC.
- **Strategic Partner in the Development of MEDIXLAB:** We collaborated on the first virtual reality laboratory in Central America (2020-2022), a project financed by BID Lab for a value of \$390,000.
- Among others...

At Vertex Studio, we are committed to excellence and innovation. Join us on our journey to transform ideas into tangible realities.
